METAL-GUARD
VCI MASKING FILM

Premium Metal-Guard® VCI Masking Film **Protects Metal from Corrosion, Scratches, Defects**

Product Description

Premium Metal-Guard® VCI masking film protects highly polished metal surfaces against scratching, marring and corrosion. The pressure-sensitive film adheres firmly to the metal and is easy to remove, leaving the metal clean from residue and ready to use. The transparent, peel-off film is designed to safeguard a wide range of metals and adhere to multiple substrates, keeping them corrosion-free for months.

Corrosion Protection

Premium Metal-Guard masking film incorporates multi-metal corrosion inhibitors with a water-based pressure-sensitive adhesive system. It provides temporary protection for metal parts and equipment during all phases of manufacture, storage and handling. The strong, protective film withstands roll forming, bending, cutting and stamping, making it ideal for use in metal fabrications, metal service centers, doors, trim works, and heavy duty industrial equipment stored indoors.

Features

- Multi-metal VCI protection
- Reduce rejects due to surface damage and corrosion
- Lightweight, odorless, safe and easy to handle
- Water-based, pressure sensitive adhesive system
- Clean peel film; leaves no residue on metal surface
- Withstands bending, cutting and forming operations
- Transparent film permits inspection
- Available in rolls up to 80" wide

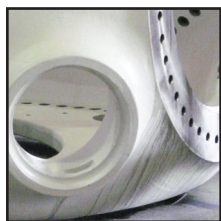

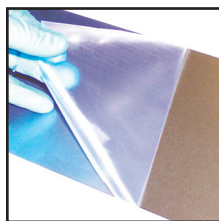

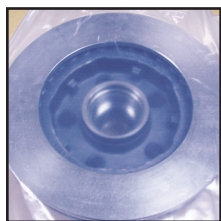

Typical Applications

- Specialty finishes that need to remain flawless
- Precision and machined metal surfaces
- Polished, coated metals
- Metals that require protection from defects during manufacturing, fabrication, handling and shipping

Guidelines For Use

Apply the film directly to a clean, dry metal surface. For best results, use at temperatures between 60°-80°F (16°-27°C), and relative humidity levels between 30-70%. The water-based acrylic adhesive is clear, odorless, lightweight and safe. To remove, peel film away from metal. No special equipment is required.

For best results, Daubert Cromwell always recommends testing prior to actual use.
